“Airport Transfers”

ARRIVAL & DEPARTURE PROCEDURES

C.S.S.'s involvement with your Airport Transfers begins long before your group arrives . . . Upon receipt of your manifest our computer operators create a customized data base containing all the pertinent flight arrival and departure information for each member of your group. Changes in your manifest will be updated continually in order assure the accuracy and timeliness of your guests' transfers. Your Program Operations Manager will analyze the arrival and departure patterns of your group and assign transportation to optimize the use of each vehicle. All transportation is required to “spot” 15 minutes prior to scheduled arrival or departure time.

Prior to the day of arrival copies of the manifest are provided to key personnel at your hotel to assist in coordinating hotel check in procedures and staffing (i.e. bellman, front desk personnel, etc.)

On arrival day, C.S.S. will station our uniformed C.S.S. Staff at the Baggage Claim area of the airport to meet all incoming passengers. We will assist in locating luggage and direct guests to specially chartered vehicles which will transport them directly to their hotel.

With the information available in the your data base, a custom designed computerized departure notice will be generated for each member of your group. Delivery of the notices to guests rooms prior to departures will be coordinated with the hotel bell staff.

On departure day, we will coordinate with the hotel bell staff a “bag pull”, providing a complete manifest with vehicle departure times. California Leisure Consultants is not responsible for gratuities for the Bell Staff.

Acclaimed as the playground of the stars since the early days of Hollywood, Palm Springs boasts the luxurious homes of such old time favorites as Bob Hope, Marilyn Monroe and Liberace. Just outside the heart of Palm Springs is our gateway to the world famous Aerial Tramway. The Palm Springs Aerial Tram, which has been called the “eighth wonder of the world”, is the largest double reversible passenger carrying tramway ever built. Two cable cars, with the capacity of 80 passengers and an operator, counter balance each other to travel from the Valley Station to the Mountain Station on the eastern escarpment of Long Valley, in less than 18 minutes. This spectacular attraction, reaching upward with its two and a half miles of cable to the evergreen trees of the San Jacinto Mountains, is a truly thrilling experience.

During the ascent, passengers witness flora and fauna changes equivalent to those seen on a motor trip from Sonora, Mexico, to the Arctic Circle in Alaska, as you travel through five different life zones. The tram will carry you to a beautiful Alpine Lodge and viewing area that features hiking trails and unparalleled views of the valley below.
